

# ROBOTICS

Do you have an interest in solving problems, perhaps being the next Albert Einstein or Thomas Edison?

Well, CCS is finalizing plans for an afterschool STEM class based on VEX IQ Robotics starting after the Christmas break. The curriculum is geared more for middle school students, and no prior knowledge is needed. The cost will be \$10 to cover the cost of the student book, which they will keep. This will be a hands-on class, so a Robotics kit will be provided for in-class use. If you are interested in reserving your spot or if you have more questions, send an email to [robotics@darcomputing.net](mailto:robotics@darcomputing.net). Please include the student's name and grade level.
